DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1–3 and 30–33, drawn to a composition comprising FGF-18.

Group II, claim(s) 1 and 30–33, drawn to a composition comprising Shh.

Group III, claim(s) 1 and 30–33, drawn to a composition comprising β -catenin.

Group IV, claim(s) 1 and 30–33, drawn to a composition comprising a Wnt protein.

Group V, claim(s) 7, 8 and 34–41, drawn to a nucleic acid molecule encoding FGF-18.

Group VI, claim(s) 7, 34–37 and 39, drawn to a nucleic acid molecule encoding Shh.

Group VII, claim(s) 7, 34–37 and 39, drawn to a nucleic acid molecule encoding β -catenin.

Group VIII, claim(s) 7, 34–37 and 39, drawn to a nucleic acid molecule encoding a Wnt protein.

The inventions listed as Groups I–VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: FGF-18, Shh, beta-catenin and Wnt proteins, and nucleic acid molecules encoding same, are all known in the prior art. FGF-18 protein and nucleic acid are disclosed by Ohbayashi (J Biol Chem. 1998 Jul 17;273(29):18161-40). Shh protein and nucleic acid are disclosed by Marigo (Genomics. 1995 Jul 1;28(1):44-51). Wnt protein and nucleic acid are disclosed by Tanda (DNA Seq. 1995;5(5):277-81). β -catenin protein and nucleic acid are disclosed by Nollet (Genomics. 1996 Mar 15;32(3):413-24). Therefore groups I–VIII cannot be considered novel or cannot be considered to involve an inventive concept. Therefore, the groups do not fulfill the requirements for unity of invention.

If group I or V is elected, this application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Shh, β -catenin and Wnt.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 3 and 41 correspond to the species.

The following claim(s) are generic: 3 and 41.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Shh, beta-catenin and Wnt proteins, and nucleic acid molecules encoding same, are all known in the prior art. Shh protein and nucleic acid are

Art Unit: 1647

disclosed by Marigo (Genomics. 1995 Jul 1;28(1):44-51). Wnt protein and nucleic acid are disclosed by Tanda (DNA Seq. 1995;5(5):277-81). β -catenin protein and nucleic acid are disclosed by Nollet (Genomics. 1996 Mar 15;32(3):413-24). Therefore the species cannot be considered novel or cannot be considered to involve an inventive concept. Therefore, the species do not fulfill the requirements for unity of invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
